

UNIVERSITY OF CALIFORNIA SAN DIEGO

A Demonstration Dissertation Exercising Every Template Feature

A dissertation submitted in partial satisfaction of the
requirements for the degree Doctor of Philosophy

in

Computer Science

by

Ada Lovelace

Committee in charge:

Professor Alan Turing, Chair
Professor Grace Hopper
Professor John von Neumann

The dissertation of Ada Lovelace is approved, and it is acceptable in quality and form for publication on microfilm and electronically.

University of California San Diego
2026

DEDICATION

For everyone who reads templates so others do not have to.

EPIGRAPH

“Beware of bugs in the above code; I have only proved it correct, not tried it.” —

D. E. Knuth

PREFACE

This document is a fixture, not a dissertation.

ACKNOWLEDGEMENTS

I thank the maintainers of Typst and the UCSD Graduate Division.

Chapter 2, in full, is a reprint of material as it appears in the *Journal of Demonstrations*, 2025, Lovelace, Ada; Hopper, Grace. The dissertation author was the primary investigator and author of this paper.

VITA

2018	B.S. in Computer Science, University of California San Diego
2020	M.S. in Computer Science, University of California San Diego
2026	Ph.D. in Computer Science, University of California San Diego

PUBLICATIONS

Lovelace, A. (2023). *Notes on the Analytical Engine*. Journal of Demonstrations.

FIELDS OF STUDY

Major Field: Computer Science

ABSTRACT OF THE DISSERTATION

A Demonstration Dissertation Exercising Every Template Feature

by

Ada Lovelace

Doctor of Philosophy in Computer Science

University of California San Diego, 2026

Professor Alan Turing, Chair

This abstract demonstrates the required heading, the two-and-a-half inch top margin on its first page, and the structured header naming the title, author, degree, university, year, and committee chair. The body is double-spaced and deliberately brief

so it stays well under the three-hundred-fifty-word limit for a doctoral abstract. It summarizes a document whose only contribution is to exercise every formatting feature the template provides.

CHAPTER 1

Introduction

This is a placeholder introduction. It carries a footnote¹ to exercise footnote styling.

Background

A subsection so the table of contents shows a level-2 entry.

Details

A sub-subsection so the table of contents shows a level-3 entry.

Figure 1.1: A demonstration figure; its caption sits below the image.

Table 1.1: A demonstration table; its caption sits above the table.

Header A	Header B
1	2

A long quotation, single-spaced and indented half an inch on both sides:

This is a long quotation of more than six lines. It must be single-spaced and indented an additional half inch on both the left and the right, with no quotation marks added by the template. It runs long enough to wrap across several lines so the single spacing is visually distinct from the double-spaced body around it.

¹A demonstration footnote: it must render at ten points and be single-spaced regardless of the double-spaced body around it.

CHAPTER 2

Methods

Placeholder methods chapter. It contains a scheme, a graph, and a figure whose caption is large enough to warrant a facing caption page.

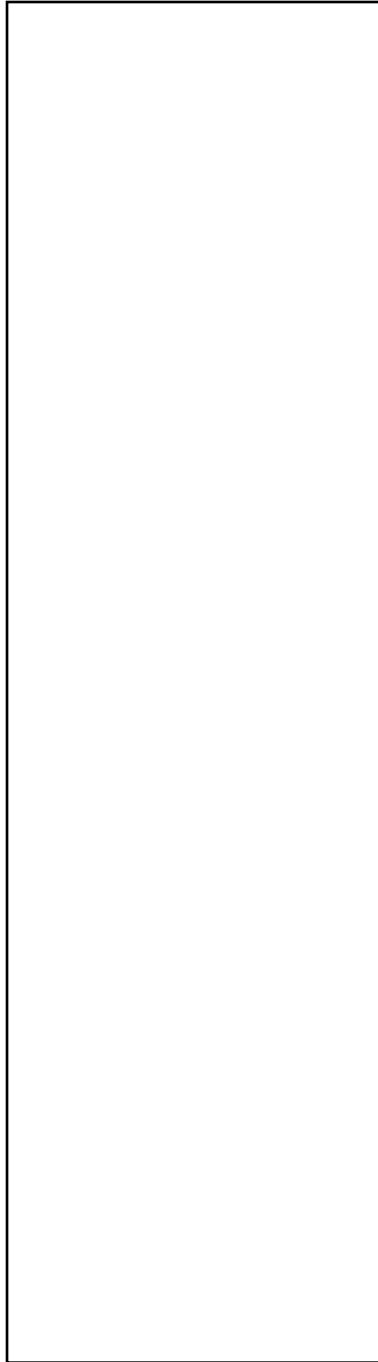

Scheme 2.1: A reaction scheme; its caption sits below the scheme.

Graph 2.1: A graph; its caption sits above the graph.

Figure 2.1: A tall figure shown on the page following its caption, demonstrating the facing-caption-page layout for oversized floats.

Chapter 2, in full, is a reprint of material as it appears in the *Journal of Demonstrations*, 2025, Lovelace, Ada; Hopper, Grace. The dissertation author was the primary investigator and author of this paper.

CHAPTER 3

Results

Placeholder results chapter. It contains a landscape figure and a figure with a long caption abbreviated in the List of Figures.

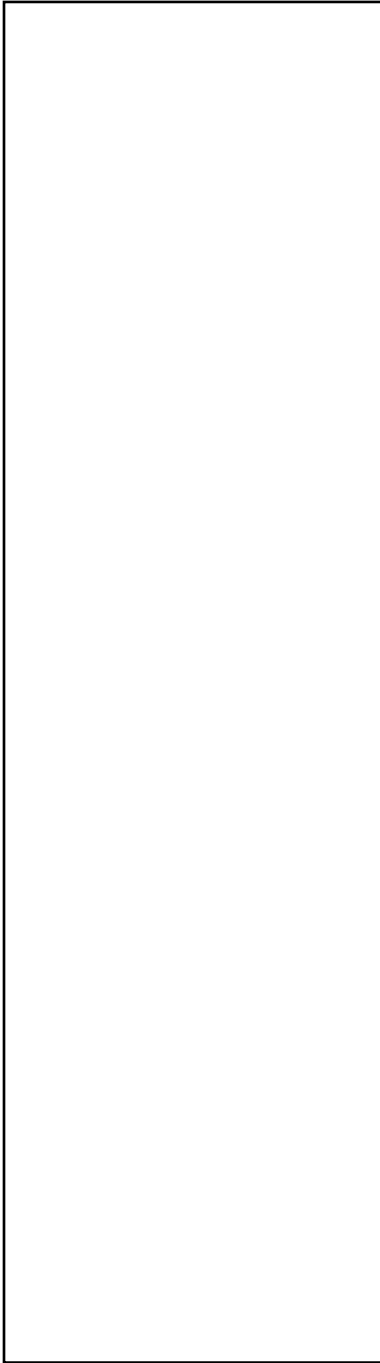

Figure 3.1: A wide figure rotated ninety degrees so its top edge lies along the left margin.

Figure 3.2: A figure whose full caption is far too long to sit on a single line in the List of Figures, running well beyond four lines when typeset at the body width, which is precisely why a short form is supplied for the list.

APPENDIX A: Demonstration Appendix

This appendix is permitted to be single-spaced. It demonstrates that an appendix heading does not receive “CHAPTER N” treatment.
